

If you have machines for sale the following options are available to you:

- You need space or wish to realize an asset value

In this case we would need to consider if buying a machine for stock is of interest and would make an offer for same or find other dealers who may be interested to purchase same. Prior to dismantling the machine we would arrange for payment and organize the dismantling logistics and transport.

Please give us the technical specification of the machine with photos and indicate to us the price which you wish to realize.

- You have time for marketing the machine?

If so, the following options are available which may realize a higher asset value for you and through our marketing capability can create a win-win situation for both parties.

- please send us the complete technical specification of the machine with photos
- indicate the price which you wish to achieve
- we will enter the machine into our structured Database under : [www.used-machines.de](http://www.used-machines.de) and offer out the machine as GPC with our mark-up
- we can publish the machine in our „Sales“ NEWSLETTER (which is sent to end-users), with a circulation of 130.000 in ca. 120 countries

## Do you have machines for sale?

---

- we can organize the inspection of the machine
- we would act as buyer (for you a simple local sale), payment and loading to be handled by us
- we can handle the complete Export logistics

Should you have machine tools for sale and are looking for a competent Partner then speak to us
